

SINAFUN RADIATION

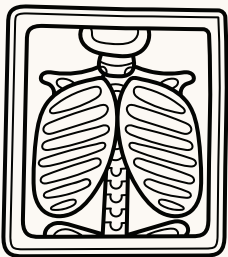

Kinompren din I Piniligrun Hinemlo' ginen Radiation

Ginen I tatmi siha mamaila' piniligrun hinemlo' yan radiation. I manpribeniyi na taotao gi frontline, entera gi areklamenton I ahensian-niha pot sinâfun radiation yanggen guaha tiningo' atrebin tinâtme.

Regulât na Imaging gi Inadahin Hinemlo'

- Computed Tomography Scans (CT scans)
- DEXA Scans (Densitometry Tolang)
- Fluoroscopy
- Amot Nuclear
- Radiography yan Dental X-rays
- Mammography

Benefisiun Radiation Siha

- Ha pribeninyi la maolek na inatan munidensia, gigat hâga', tissues, yan te'lang siha.
- Ma nâ'i hao infotmasyon ni para un disidi kao esti na operasyon mas maolek na disision para hagu.
- Siña ma usa para u inasisti i regulasyon medikât tat kumo pinegan catheters, stents, pat otro na kosas gi san halom i tataotao.

Atrebin Radiation Siha

- Tai atrebi esti i radiation para i taotao an tinâtmi kada dia. Lao, mas tatkilo' i atrebin debelamentun kânses ginen i imaging gi la despues gi lina'la' i taotao.
- Guaha siha na imaging ni la tatkilo' i inâmtin radiation siña ha na' agaga' i sensen yan kontudo ha na' tai gapotulu-hao.
- Ginen i temu, siña nina' gai cha'ot hao ginen palu na imaging.

Regulasyon Imaging Siha yan Radiation

- I radiation ha laknos huyong digital images nai man ma u'usa para uma sodda' I sustânsian I prubleman medikât siha.
- La takhilo' siha na inâmti siña man gai aminâsu.
- Profesionât medikat siha man ma eduka yan seti ika para uma kundukta estudiun imaging siha gi halom hospitât, sentrun imaging siha, yan fanamtiyan siha.
- Regulasyon imaging siha ha dililiba radiation solo ha' gi mâs tatpapa' na inâmti gi pâttan tataotao siha nai nisisita imaging, yan protetehi otro siha na pâttan tataotao.
- I tataotao siña ha arekla i cells nai yinamak ginen i radiation ginen i imaging.
