What if I Can’t Afford the Vaccines?

- If you live in a Native Hawaiian Health Center, an Indian Health Service (IHS) clinic, or a Federally Qualified Health Center (FQHC) and you’re uninsured or covered by Medicaid, Medicare, or another insurance plan, you can get the COVID-19 vaccine for free. For more information, visit www.cdc.gov/vaccines

- If you have Medicare, Medicaid, or another insurance plan, you may not have to pay anything for your COVID-19 vaccine. Your health plan must cover the vaccine for you and must not require you to pay a copay or deductible. For more information, visit medicare.gov/covid19-vaccine

- If you need help paying for transportation to get your COVID-19 vaccine, visit www.medicalcartservice.org

- If you’re self-employed or are not covered by another plan, you may be able to get help paying for your COVID-19 vaccine through your local public health department or your state’s health department. For more information, visit www.cdc.gov/vaccines
