<td>• Individuals 18 years and older, who received a primary vaccine and booster dose of the J&amp;J vaccine</td>
</tr>
<tr>
<td></td>
<td>• Individuals 12 years and older who are moderately or severely immunocompromised and have completed primary series</td>
</tr>
</tbody>
</table>
Children who are 5-11 years old should get a booster shot 5 months after completing their primary series of Pfizer-BioNTech. If your child is immunocompromised, they should get a booster shot 3 months after their primary series.
INDIVIDUALS 12 YEARS AND OLDER

All individuals 12 and older should get a booster shot 5 months after completing their primary series of Pfizer or Moderna OR 2 months after receiving the Johnson & Johnson (J&J) vaccine.
STAY UP TO DATE

IMMUNOCOMPROMISED INDIVIDUALS 12 YEARS AND OLDER

Moderately or severely immunocompromised individuals 12 and older should get a second booster shot 4 months after receiving their first booster dose.
INDIVIDUALS 50 YEARS AND OLDER

Individuals 50 and older should get a second booster shot 5 months after receiving their first booster shot.
INDIVIDUALS 18 YEARS AND OLDER WHO RECEIVED J&J

Individuals 18 and older, who received a primary vaccine and booster dose of the J&J vaccine 4 months ago, can receive a second booster dose of an mRNA COVID-19 vaccine.
COVID-19 RESOURCES

To schedule a COVID-19 vaccine appointment, visit vaccines.gov, call 1-800-232-0233, or text your ZIP code to 438829. You can also reach out to your local physician, community-based organization, Federally Qualified Health Center, Rural Health Clinic, or Native Hawaiian Health Center for additional help.
